Feed the Future Food Security Innovation Center

Siegfried Modola

The Feed the Future Food Security Innovation Center leads USAID's implementation of the Feed the Future research strategy.

Within the center, we organize projects around seven key challenge (program) areas related to sustainably transforming agricultural production systems, ensuring access to nutritious and safe foods, creating enabling and supportive policies, and addressing the emerging challenges of climate change and natural resource scarcity.

The center also builds capacity in agricultural research, extension and education, and leads a major effort on [scaling up agricultural technologies](#). It helps strengthen coordination across program areas and encourages a multi-disciplinary approach and cross-project learning.

Explore the seven areas:

- [Climate-Resilient Cereals](#)
- [Legume Productivity](#)
- [Advanced Approaches to Combat Pests and Diseases](#)
- [Research on Nutritious and Safe Foods](#)
- [Markets and Policy Research](#)
- [Sustainable Intensification](#)
- [Human and Institutional Capacity Development](#)
